

ACTI Courseware Licencing Benefits

1) Audits of Course Material Content

- a) Material content is audited by an industry expert, professional engineer and a Standards Council of Canada accredited international registrar.
- b) The purpose of these audits is to ensure the content is in accordance and compliant to all applicable national and international standards.
- c) The material content is in compliance to CSA –B167-96, ASME B30-96 series and ISO-9926-1- for drivers and Federal OSHA regulations.
- d) The audits are performed annually to ensure compliance to current applicable standards and continuous improvement of the training products.
- e) These audits are objective proof of due diligence, which in turn relieves a lot of the liability to ACTI, our instructors and our clients.

2) Training Standardization Benefits

- a) ACTI training products are standardized for use across Canada, the United States and internationally.
- b) Standardization of training provides easier traceability for multi-site organizations.
- c) Provides proper objective evidence of due diligence of the training throughout the organization.
- d) ACTI'S "Supervisor Course" ensures that all supervisory personnel are trained with the same methodology, making it easier to maintain the requirements of the corporate Health & Safety Program.
- e) Internal and external audits are performed on one single training program rather than training programs with different recording systems and objectives.

3) Benefits of ACTI Training Licence

- a) Having one standardized training program applicable to all locations
- b) In-house expertise for providing the training.
- c) Flexibility to provide training on an as needed basis. (New hires)
- d) Assurance that material content is maintained and current to applicable standards.
- e) Cost effectiveness will ensure all workers are properly trained in overhead crane hoisting and rigging applications.
- f) Standardized training is a cost effective and time efficient method of training delivery.
